TITLE : PRODUCTION OF OPTICAL DISK AND
DISK SUBSTRATE FORMING DEVICE

ABSTRACT : PURPOSE: To drastically reduce the production cost of the optical disks.

CONSTITUTION: A sheet successively joined with plural disk shape parts via a resin is formed by using the disk substrate forming device 10 having metallic molds provided with plural stampers 11, resin supply ports 14 and cavities 15. Metallic films, recording films, protective films, etc., in a sheet state are then formed and the sheet is finally blanked in compliance with the disk shape.
